

HP and Fraame Solutions

FileVision

FileVision provides an efficient and secure information and relationship management solution for healthcare providers.

Complexity and cost

The FileVision solution assists healthcare organizations in meeting the many responsibilities they have in managing the accuracy and integrity of their information. The FileVision solution also improves the value they gain from the funds invested in managing this diverse business information.

Simplicity and flexibility

There is a continually increasing demand being placed on organizations to operate more effectively and deal with an array of complex compliance, policy and administrative challenges. Fraame Solutions was established to assist organizations in meeting these challenges in a timely and professional manner. Fraame with the FileVision solution has particular expertise in the following functional areas of information and relationship management: the delivery of client-focused administration and support programs, contract management, corporate information management, compliance and accreditation management, policy and procedure management and human resource management.

Solution benefits

- Improves communications and enhances customer service
- Offers an affordable, scalable and easy-to-use software solution
- Reduces administrative costs and provides flexible ways to retrieve information

- Eliminates endless searching and expensive off-site storage
- Assists in improving staff productivity

Working together with HP

The convergence of numerous factors—including bioscience innovations, increasing healthcare costs, the aging population, technology adoption and individuals demanding more empowerment over their health management—are pressuring the health and life sciences industry to transform. We partner with HP to deliver solutions that drive down costs, improve quality of care, and transform the methods for managing and delivering health care.

Productivity improvement

Fraame's number one focus is delivering solutions and services that enhance an organization's ability to effectively manage one of its most valuable resources—information—thereby dramatically improving productivity. Productivity improvement and cost reduction is associated with better access to and retrieval of information; enhanced information storage and reduction of filing errors; effective document version control; reporting and auditing assistance in meeting privacy, security and regulatory compliance with government mandates as a key productivity driver. FileVision also assists in improving employee productivity, communication and consistency. Productivity is also achieved through improvement in business processes, security and confidential and/or regulated information, and improved decision-making and support. The Fraame team delivers quick and efficient training and implementation services to ensure a successful project outcome.

HP products supported

Our solutions are supported on industry-standard HP ProLiant servers, renowned for their performance, availability and scalability. From server blades to clustered servers, HP ProLiant servers lead the Microsoft® Windows® market. Today, with new Opteron-based HP ProLiant models, HP further extends the advantages of x86 computing by delivering more cost-effective, industry-standard solutions for applications requiring expanded memory and outstanding price/performance.

Operating systems supported

Our solutions are optimized for Microsoft Windows environments. By working collaboratively with HP, we can leverage extensive HP experience—deploying more than 11 million Microsoft Windows 2000/2003/XP seats, as well as over 1400 Microsoft .NET projects—to design a Microsoft Windows-based solution that precisely matches your business needs. You can trust HP to deliver highest-quality solutions quickly, efficiently, and at the best cost—enabling you to keep pace with the rapid changes in today's volatile marketplace.

Service and support

We provide you with a complete portfolio of services tailored to your business and IT needs. We leverage the proven methodologies and expertise of over 65,000 HP Services professionals worldwide to help design, build, integrate and manage an infrastructure that lets you respond to business changes easily and cost-effectively.

Building on the value of strong relationships

By working with HP, we have the resources, experience and knowledge of an industry leader to ensure our solution delivers the business results and value your company requires. HP is a company that thrives on innovation, with a proven track record of success in virtually every market, customer segment and region worldwide. Together, we have the technology and services to meet your most demanding needs.

The Fraame team, who are proven health industry professionals, have many years of experience in the delivery of effective application solutions for the healthcare sector. In partnership with HP expertise in the delivery of cost-effective, industry-standard technology solutions, we can deliver a complete and cost-effective FileVision solution.

Working together to drive success

By combining standards-based and modular technologies with our leading-edge applications and a full portfolio of services, you gain a powerful, flexible solution that meets your business needs today—and adapts dynamically as those needs change. That's the foundation for building an agile, responsive enterprise to drive better business outcomes for your long term success.
